

# Virtual Testing Frequently Asked Questions

## **Can my coach proctor my test?**

No. Your proctor must be an impartial (unbiased) person of authority. The proctor cannot have coached the skater or be a training mate/parent/guardian that is biased towards the skater. Please refer to our [Testing Policy](#) for guidance on who can be used as a proctor.

## **What does the skater wear?**

The skater should wear proper attire for testing, just like they would in person.

## **Where can my skater “test”?**

Testers are responsible for arranging their own ice. Skaters (or skater’s parents/guardians) should check ice rules for their rink to be sure that virtual testing is allowed.

## **When do I get results?**

Results will be sent to the coach via email immediately after the judges have returned them to the club.

## **How many times can the test be recorded?**

The test can be recorded as many times as needed, but the recording process should only be started once the skater has an extremely strong and ready test. Only one video can be submitted for the registered test.

## **Who will record my skater’s video?**

Testers are responsible for organizing their own videographer. The videographer can be anyone including a professional, coach, another skater or someone who is skilled at recording.

### **Is the standard the same?**

Yes. Virtual testing should be treated exactly like an in-person test session.

### **Where can permission forms from my club be sent?**

Permission to test forms should be sent to [membership@sc-fsc.com](mailto:membership@sc-fsc.com)

### **When should my skater's test be recorded?**

Skaters should record their tests as soon as possible after the test sign-up (as long as it is within the 30-day guideline), given that the test is ready to be taken. Recording early allows for unexpected errors, video upload issues, and even re-recordings if needed.
